Varicose Vein Treatment

- ✓ Vein Consultation
- ✓ Vascular Ultrasound Screening
- ✓ Medical Management of Venous Disease
- ✓ Injection Sclerotherapy
- ✓ Ambulatory Phlebectomy
- ✓ Endovenous Ablation
- ✓ Cosmetic laser for Veins
- ✓ Vascular Aesthetics

Vein Procedures

- ✓ Treatment of Large Varicose veins is covered by most insurances, including Medicare and most private insurance companies. Our Billing and insurance specialist will assist you with all your questions.
- ✓ Sclerotherapy is an office based procedure for small veins. Sclerosing solution is injected into the veins using very tiny needle which cause vein to close and disappear.
- ✓ Ultrasound guided Sclerotherapy uses ultrasound to locate veins and deliver medicine directly into the vein for maximum benefit.
- ✓ Endovenous Ablation is an office based minimally invasive procedure for large veins.
- ✓ Phlebectomy is removal of small veins by making a very small incision under local anesthesia.
- ✓ Laser is used for facial veins and very fine veins on the body

Vascular Risk Assessment

- ✓ We can assess your risk of Stroke due to Carotid Artery Disease, Risk of an Aneurysm and Peripheral Artery disease (PAD) with an Ultrasound exam and checking Ankle Brachial Index (for PAD).
- ✓ We offer a complimentary Screening for Veins either in person or online.
- ✓ During Screening we review your symptoms and outline plan of care.
- ✓ Limited screening ultrasound done first to screen and if necessary we will schedule a comprehensive ultrasound exam.
- ✓ Depending on the availability we are happy to accommodate special requests for evening and weekend hours.

OFFICE BASED PROCEDURE

- ✓ You are able to resume your daily activities right after the procedure.
- ✓ We offer needle free numbing to make it more comfortable if you have needle phobia.
- ✓ One third the cost of same procedure done in the hospital setting.
- ✓ Covered by most insurance companies
